1 POSTDOCTORAL FELLOWSHIPS FOR RESEARCH WITHIN BIOTECHNOLOGY-BASED SYNTHESIS AND PRODUCTION

Nordic region 2019

1.1 PURPOSE
Applications are invited for individual fellowships to support outstanding postdoctoral scientists conducting research within biotechnology-based synthesis and production. The fellowships will be awarded for fundamental and applied research projects aimed at generating products in improved and more sustainable ways. Fellowships must be based at a university or other non-profit research institution in Denmark, Finland, Iceland, Norway or Sweden. Up to 10 fellowships will be awarded in 2019.

1.2 RESEARCH AREAS ELIGIBLE FOR GRANT FUNDING
Projects must involve a clear element of biotechnology, and may in addition utilize any other scientific and engineering discipline relevant to achieve the objectives. Projects should include one or more of the following topics:

- Use or engineering of biological tools and systems for synthesis and production of valuable products (for example, chemicals, fuels, bioactive compounds, proteins, materials as well as fibre, food and feed products).
- Development of technologies and processes that can directly support biotechnology-based synthesis and production.
- Improvement of the production potential of microorganisms, plants, animals, or enzymes.
- Biotechnology to improve raw material utilization, reduce energy consumption and/or decrease waste generation.

Projects must contain a laboratory component and show a clear and plausible path from the proposed research to applications in the area of biotechnology-based synthesis and production.

1.3 ELIGIBILITY
An applicant must either:
- have a PhD or equivalent degree obtained within 6 years of the application deadline date.
or
- be a PhD student who will defend her/his thesis before November 1, 2019. The PhD supervisor must confirm the expected defense date. A fellowship cannot be activated before the requirements for the PhD are completed and approved.

The applicant must consult with the planned supervisor at the Nordic host institution before submitting the application. If a research stay in another country is proposed (see below), the planned supervisor at that location must also be contacted prior to applying. The Nordic host institution will administer the fellowship throughout the fellowship period, including possible periods when the postdoctoral research is performed at another research institution, inside or outside of the host institution country. To utilize the fellowship, a recipient must be accepted as a postdoctoral employee at the Nordic host institution (in Denmark, Finland, Iceland, Norway or Sweden).

The applicant has the main responsibility for developing the project, writing the application, and carrying out the research.
1.4 Grant Duration

The postdoctoral fellowship can be 1, 2 or 3 years in duration. The duration of the fellowship should reflect the time frame of the research activities.

1.5 Research Stay at a Laboratory Abroad

At least 1 year of a fellowship must be used at the Nordic host institution. For applicants currently based at a Nordic host institution who have not conducted research in another country, a research period with a minimum of 6 and maximum of 12 months in total at a laboratory in another country will be considered as a positive element for the postdoctoral training, but is not a requirement.

1.6 Grant Funding

Up to DKK 800,000 per year, that is available for:

- The fellowship recipient’s own salary, including pension
- Direct project costs and operating expenses.
- Scientific equipment up to a cost of DKK 100,000 for an individual instrument.
- Costs to publish the results of the research and to present them at an international conference.
- Salary costs for technical/scientific assistance.
- For a 6-12 month stay at a laboratory in another country, an additional amount up to DKK 100,000 for travel and housing costs abroad can be included in the budget.
- Administrative support for the Nordic host institution to administer the individual fellowship (up to 5% of the total funding applied for).

Details of the funding that can be applied for are found under Budget on page 8 and the instructions for the budget in the application are found on page 12.

IMPORTANT! The grant may not be used to cover ‘overhead’ (i.e. rent, electricity, water, maintenance etc.).

Novo Nordisk Fonden does not allow double funding of projects:

- If the applicant has received funding for the project or parts of the project from other sources, this must be included in the budget under Additional contributions for the project.
- If the applicant following submission of the NNF application receives funding for the project or parts of the applied project from others, NNF must be contacted as soon as possible.

1.7 Language

The application must be in English.

1.8 Application Procedure

The application must be completed and submitted using the foundation’s electronic application and grant management system, “NORMA”, which can be accessed at https://norma.novonordiskfonden.dk
Further information on how to access and navigate in NORMA can be found starting on p. 9.

It is important that the applicant carefully reads these guidelines before initiating the application process, as this document contains the complete call text as well as instructions for the completion of the application.

1.9 REQUIRED SUPPORTING DOCUMENTS

- Host letter from the planned postdoctoral supervisor in Denmark, Finland, Iceland, Norway or Sweden acknowledging that the postdoctoral fellow can conduct the proposed project in the supervisor’s lab. *Must be submitted as a pdf file together with the electronic application*

- If the project will involve a 6-12 month stay at a laboratory in another country: A host letter from the collaborating laboratory confirming that the postdoctoral fellow can work on the project at that institution. *Must be submitted as a pdf file together with the electronic application*

- If the applicant is a PhD student: Letters from the PhD supervisor first confirming the timeline for thesis completion before November 1, 2019 and later to document the successful PhD defense. *The pre-thesis letter must be submitted as a pdf file together with the electronic application. If a fellowship is awarded, the post-defense letter is to be sent to the NNF via email.*

1.10 EVALUATION OF APPLICATIONS

The evaluation of applications for these postdoctoral fellowships will occur through expert peer review. The members of the scientific review committee are posted on the NNF website. The evaluation of applications will emphasize scientific excellence, originality and potential as well as the achievements of the applicants.

As a general rule, the Novo Nordisk Foundation processes all applications and grants in accordance with the rules followed by public research councils and foundations. This applies, in particular, to conditions concerning confidentiality, reviewer eligibility, impartiality and conflicts of interest. The Foundation does not, however, provide scientific reasons or feedback for applications that are not selected for funding. Applications from ineligible applicants will not be reviewed.

</table>

January 30, 2019, 2pm CET
Application deadline

May 1, 2019
Earliest possible start date

Please note that the awards will be presented at a fellowship celebration event at the Novo Nordisk Foundation on the afternoon of May 14, 2019. Awardees will receive an invitation to this event.
1.12 ESSENTIAL INFORMATION FOR COMPLETING THIS APPLICATION

Below are the instructions for specific fields of the application for a postdoctoral fellowship for research within biotechnology-based synthesis and production.

**Under APPLICANT INFORMATION**

**CV**

Please include in your CV:

- Education
- Employment history
- Summary publication and bibliometric information. References for up to 10 publications are to be entered in the field below.
- Other relevant information

(max. 4,000 characters)

**Publications**

Please provide the complete reference information for your most important publications (up to 10). Include all authors (or number of authors, if necessary) for each publication and use bold or underline for your name. Applicants are strongly encouraged to provide a full list of publications in ORCID.

(max. 5,000 characters)

**Supplementary Information**

This field can be utilized if there is additional information that is important for the committee’s review of your application.

(max. 2,000 characters)

**Under PROJECT INFORMATION**

**Brief project description**

Please provide a concise description of the project. Include:

- The scientific question that is being addressed.
- An explanation of how the research is within scope of the Call.

(max. 2,000 characters)

**Project description**

(max. 20,000 characters - including spaces, line breaks and special characters).

Please describe your proposed research project in detail. Elements to be included are:

- Purpose
  - Research question(s) to be addressed
- Specific aims
- Scientific background that is most important for the project
- Experimental plan
  - Primary experimental designs and procedures
  - Methods and technologies to be utilized and developed
- Discussion of experimental outcomes and significance
  - Alternative approach(es) that may be needed
If the project will occur in more than one investigator’s laboratory, include information regarding how work on the project will be divided and integrated.

If the project is a part of a larger project, or is related to ongoing projects in the same group/team, this must be explained. The activities to be supported by the NNF grant should be specified.

Up to four illustrations (images, figures, tables, etc.) can be included for the project description via the Illustration Uploads function immediately below.

The complete reference information for the literature cited in the project description is to be entered into the Literature references field below the Illustrations Uploads.

Lay project description

Please provide a non-confidential summary that is suitable for publishing on the Novo Nordisk Foundation website in case the project is funded.

(max. 1,000 characters)

Under BUDGET

The allowable expenses and budget posts for a postdoctoral fellowship for research within biotechnology-based synthesis and production are:

- Salary - main applicant (amount to be based on the postdoctoral fellow salary scale at the Nordic host institution – consult with the Nordic host institution for this)
- Operating expenses
- Equipment (maximum amount of DKK 100,000 for an individual instrument)
- Travel / Relocation expenses
  
  If the fellowship will include a 6-12 month stay at a collaborating laboratory in another country, costs up to DKK 100,000 in total for travelling and staying there can be included in the budget. The amount for travel & housing costs abroad is in addition to the annual maximum of DKK 800,000 for all other expenses. (Please note that funds covering personal expenses are taxable.)
- Conference Participation (maximum amount of DKK 25,000 per budget year)
- Publication costs (maximum amount of DKK 25,000 per budget year)
- Salary - research technician (for salary costs for technical/scientific assistance)
- Bench fee:
  Support for individual researchers for the coverage of direct expenses needed to conduct the proposed research project. Bench fees must be specified in the budget, and may only be used for operating expenses, lab consumables, and access to lab space and facilities that cannot be included within another individual budget category. To include a bench fee in the budget, the fee must be part of the general expenses policy of the institute/institution, and apply for all employees for which the policy concerns.
- Direct administrative expenses:
  For administrative support of the fellowship, an amount up to 5% of, and included in, the funding applied for from the NNF may be included in the budget. The administrative support:
  - can cover non-scientific, administrative expenses in relation to the project, such as accounting, administration related to payment of salaries and purchasing, hiring, as well as auditing and financial reporting on the project
  - cannot cover administrative expenses that are not directly related to the project
  - is not automatically included in the grant, and must be stated/applied for in the application budget, but should not be specified in detail
- Other
Under UPLOADS

Via Hosting letters:
- Host letter from the planned postdoctoral supervisor in Denmark, Finland, Iceland, Norway or Sweden acknowledging that the postdoctoral fellow can conduct the proposed project in the supervisor’s lab.
  Must be uploaded as a pdf file
- If the project will involve a 6-12 month stay at a laboratory in another country: A host letter from the collaborating laboratory confirming that the postdoctoral fellow can work on the project at that institution.
  Must be uploaded as a pdf file

Via Other Uploads (only for current PhD students):
- If the applicant is a PhD student: A letter from the PhD supervisor confirming the timeline for thesis completion before November 1, 2019.
  The pre-thesis letter must be uploaded as a pdf file

Do not upload any other documents/appendices - additional items will not be included in the application that is assessed.

2 THE NOVO NORDISK FOUNDATION APPLICATION AND GRANT MANAGEMENT SYSTEM - NORMA

2.1 USER REGISTRATION
The Novo Nordisk Foundation (NNF) application and grant management system “NORMA” can be accessed through links on NNF’s website or directly at: https://norma.novonordiskfonden.dk

Before you begin, please read the instructions and technical information on the login page.

It is possible to register as an organization in the application system; however, organizations are currently only eligible to apply for open calls within 'Social and Humanitarian Grants' and 'Education and Outreach Grants'.

If you hold an active grant, or if you have applied for funding from NNF recently, a user account for you may already exist in the NORMA system. You can check this by clicking “Forgot Password?” - enter the email address you used when previously applying and request a new temporary password. If you are not in the system, you will receive an email within 5-10 minutes with your login details and the temporary password. If you are not in our system, please register as a new user.

The registered user who submits the application(s) is ‘the applicant’ and is the legal entity responsible for the truthfulness of the content in the application.

If you experience problems logging in, please contact NNF using the contact information on page 3.
2.2 GENERAL INSTRUCTIONS

Filling in the fields
For all applications, the individual fields must be completed in accordance with the information and instructions provided in this document and the NORMA system.

| IMPORTANT! To prevent loss of data, it is essential to press “Save Draft” before you leave NORMA or navigate in the system. |

Abbreviations
Abbreviations should be defined at the first use. A list of abbreviations in the project description section is recommended.

Submission
The application in its entirety must be submitted electronically via the application system. It is not possible to submit an application or any part of it by standard mail or email. Any material submitted outside the application system will not be included in the evaluation and will not be returned.

Applications cannot be modified after the submission deadline. If you wish to make changes to a submitted application before the submission deadline, it is possible for you (the applicant) to reopen the application. Be aware that the application must be resubmitted before the deadline in order to be a valid application.

Once the application has been submitted, a confirmation of receipt will be sent to the email address for the applicant’s NORMA account. If you do not receive a confirmation of receipt, you should contact NNF as soon as possible using the contact details on page 3 or by email to nnfond@novo.dk.

Confidentiality
All applicant and application information will be treated confidentially.

2.3 IDENTIFYING THE CORRECT OPEN CALL IN NORMA

When you are logged into NORMA, you will enter ‘My Applications’, where you will find an overview of the status of your application(s) (in progress, submitted, approved and declined). In addition, there is a ‘Pending Action’ section where there may be additional requests from NNF regarding your application(s).

To initiate a new application, you first need to identify the call and grant you wish to apply for. Go to the ‘OPEN CALLS’ tab, which is located in the upper right corner of the screen.
In the ‘OPEN CALLS’ window, all currently available grants from NNF are visible in seven tabs that are sorted by NNF’s overall grant areas. Search the tabs to find the call that you wish to apply for.

2.4 CREATING AND COMPLETING AN APPLICATION

An application is initiated by clicking the blue “Apply Now” button once you have identified the call and grant you wish to apply for.

Your draft application is then created and it will remain a draft version until you actively submit the application. After submission, you can continuously edit or cancel the application prior to the deadline. However, you are responsible for submitting or re-submitting the application before the deadline.

If you wish to withdraw a submitted application after the deadline, you must contact NNF via email using the contact information on page 3.

To submit the application, it is necessary to read and accept NNF’s standards for good research practice. A link can be found in the top right corner next to your name. Further, the applicant must declare that the information provided in the application is true and accurate.

You can at any time during the application process access a PDF view of your application, and you should always check to ensure that the PDF is readable and formatted appropriately before submission.

2.4.1 APPLICATION TEXTS

Formatted text from a word processing program such as Word can be copied and pasted into most text fields of the application. It is, however, important to check that special formatting as well as special letters and symbols have not been converted or lost in the text fields after copying and pasting.

Available functions for formatting text are at the top of the text fields. Some shorter text fields do not have the option to format.

IMPORTANT! For readability purposes, standard fonts, font size 11-12, and line spacing between 1.0 and 1.5 must be used.
2.4.2 ILLUSTRATIONS

In the 'Project Information' tab, illustrations (figures/charts/tables/images/etc.) related to the project description can be uploaded. The illustrations will be integrated in the final application PDF.
- A maximum of four illustrations are allowed.
- Include the illustration number, title and legend/caption within each illustration file.
- The following file formats are accepted in the system: JPG, JPEG, PNG, BMP.
- The maximum accepted size for each illustration is 1050 x 1650 pixels.

2.4.3 BUDGET

The budget template having the correct number of budget years for the application must first be generated. This is done by entering the Grant Period Start Date and the Grant Period End Date, which can be found under the 'Project Information' tab - then press 'Save Draft'. You must provide these dates and press 'Save Draft' before entering any information in the budget.

The budget for each year of the project is to be provided (in budget/project years, not calendar years).

Costs are to be justified in the budget table and/or supplementary information field. Include sufficient detail for it to be clear what the funding will be used for.
- To access the budget template press the blue 'Open / Edit' icon
- Press the '+' icon to add budget rows
- For each budget row:
  - choose a budget post from the drop down menu,
  - specify details for the post under Description, and
  - enter the amount under Value.
- All amounts must be stated in Danish Kroner (DKK), in whole kroner amounts only (without decimals).
- When entering DKK amounts, do not use periods, commas or spaces.
- If you convert currency to DKK, include the cost in the original currency and the exchange rate in the Description or supplementary information field.
- Save and close the template when the budget is completed.

Additional or special information related to the budget can be entered in the supplementary information field.

Funds applied for or obtained from other sources must be entered under 'Additional Contributions for the Project'. Under 'Information for additional contributions', provide information for the project regarding funding received and/or applied for from other sources. Please describe the relation of these to the budget applied for from NNF.
3 GENERAL RULES FOR GRANT APPLICATIONS

The general conditions (a-h) apply to grant applications to NNF

- The ‘applicant’ in the rules below refers to the main applicant responsible for submitting the application. There are no general rules for co-applicants.
- There may be additional application conditions for individual calls, if so these are specified in the guidelines in section 1 under ‘Eligibility’.
- If a submitted application exceeds the number allowed in points a-d, the later-submitted application will receive an administrative rejection.
- Points g-h are relevant only if you currently hold an active NNF grant.

a) An applicant may submit only one application per call.

b) For the NNF grant type “Project grants”, an applicant may submit only one application per calendar year.

c) An applicant may submit one application for either the NNF grant type "Investigator Grants" or "Postdoctoral fellowships" and may not submit another application for either grant type while the application is under review. If the applicant receives a written rejection from NNF for the submitted application, the applicant may again apply for either grant type.

d) An applicant may submit only one application for a specific purpose/project per calendar year. Submitting applications for different purposes/projects to different calls is permitted, as long as it is not to the same type of grant.

e) When applying for grants that do not allow funding for the applicant's salary, the applicant must be able to account for own salary during the entire grant period applied for.

f) NNF does not allow double funding of project expenses. If an applicant has applied for, or has received, funding for the project or parts of the project from others, this must be detailed in the budget of the application. If the applicant receives funding for the project or parts of the project from other sources following submission of the NNF application, NNF should be contacted as soon as possible.

g) It is not possible to hold more than one active grant of the same grant type. Researchers with an active grant of a specific type may be able to apply for a new grant of the same type during the final year of the grant, however, a new grant cannot be activated until the existing grant is completed and no longer active. The only exemption to this is that researchers with an active ‘Project Grant’ awarded by a specific committee may apply for another ‘Project Grant’ while their current grant is active if all three following requirements are met:
   - it is awarded by a different committee,
   - it is for a different purpose/project, and
   - the applications are not submitted within the same calendar year.

h) It is permitted to hold active grants of different types, i.e., researchers with an active grant of a specific type may apply for a new grant of a different type.

---

1 An ‘NNF grant type’ is defined by the general grant frame and/or support function. Three examples of individual NNF grants that are three different NNF grant types are: ‘Challenge Programme Grants’, ‘Steno Collaborative Grants’ and ‘Tandem Programme Grants’. Two examples of NNF grant types that include multiple NNF grants having the same general grant frame and support function are:
Type ‘Project Grants’ includes: Project Grants for Biotechnology-based Synthesis and Production Research; Project Grants in Endocrinology and Metabolism; Project Grants in Clinical and Translational Medicine; Project Grants for Clinical Nursing Research; Project Grants in Bioscience and Basic Biomedicine, Project Grants for Art History Research.

Type ‘Investigator Grants’ includes: Emerging Investigator; Ascending Investigator; Distinguished Investigator; NNF Young Investigator; NNF Laureate Investigator, Investigator Grant in Art History Research, Excellence Project for Young Researchers within Endocrinology and Metabolism, Borregaard Clinical Scientist Fellowship, Research Stipend in General Practice, and Advanced Grant in Endocrinology and Metabolism.

September 2018
The Novo Nordisk Foundation

Please read the “Terms and conditions for grants from the Novo Nordisk Foundation” that all grant recipients must comply with:
http://www.novonordiskfonden.dk/en/content/conditions-grants

The Novo Nordisk Foundation is an independent Danish Foundation with corporate interests. The objective of the Novo Nordisk Foundation is twofold: To provide a stable basis for the commercial and research activities conducted by the companies within the Novo Group and to support scientific and humanitarian purposes.

The vision of the Novo Nordisk Foundation is to contribute significantly to research and development that improves the lives of people and the sustainability of society.
