

Novo Nordisk Foundation Symposium

# Clinical Metabolomics Copenhagen 2020

The Clinical Metabolomics Copenhagen symposium 2020 will bring together world leaders in the field of metabolomics to discuss the current state of the art in the clinical metabolomics field as well as to discuss projections and outlooks for the future. Topics covered during this meeting will range from novel instrumentation and methods, structure elucidation and feature annotation, and systems level data analysis and interpretation in the context of applications to human health.

The event will take place over two days. Invited international speakers, local speakers, and speakers from industry will present on the latest research topics pertaining to clinical metabolomics during the oral sessions. Select travel grant recipients awarded to up-and-coming researchers based on a submitted abstract and motivation letter will also present during the oral session. At the end of each day's oral sessions, poster presentations will be held to provide a chance for younger researchers to showcase their work.

Many breaks with food and drinks will be provided for attendees and speakers to discuss and foster new collaborations.

## Symposium Dinner

A casual dinner at 19:00 on 19 March 2020 in the city center will be open to all with separate registration and on the attendee's expense. To register please [click here](#). Deadline for registration for the dinner is 11 March, 2020.

The event will continue the work of the Danish Clinical Metabolomics Copenhagen network (Clime) which aims to bring together the top researchers and clinicians in the region to promote collaborative research on the most pressing topics in human health.

Please go to [clime.dk](http://clime.dk) to join the network.

# Date

## 19-20 March 2020

Participation is free of charge. Registration is on a first-come first-served basis. Deadline for registration is 1 March 2020.

## List of speakers

- Nicola Zamboni, ETH Zurich, Zurich, Switzerland
- David S. Wishart, University of Alberta, Edmonton, Canada
- Claire O'Donovan, European Bioinformatics Institute (EMBL-EBI), Wellcome Genome Campus, Hinxton, Cambridge, UK
- Jennifer Kirwan, Berlin Institute of Health (BIH), Berlin, Germany
- Craig Wheelock, Karolinska Institutet, Stockholm, Sweden
- Marta Cascante, Institute of Biomedicine of the Universitat de Barcelona, Spain
- Lorraine Brennan, University College Dublin, Ireland
- Justine Bertrand-Michel, Inserm, Toulouse, France
- Mette Christensen, Rigshospitalet, Copenhagen, Denmark
- Maria Klapa, FORTH/ICE-HT, Greece
- Hanne Christine S. Bertram, Aarhus University, Denmark and many more!

## Organisers and chairs

- NNF Center for Biosustainability: Douglas McCloskey, Markus Herrgård
- NNF Center for Basic Metabolic Research: Thomas Moritz
- Statens Serum Institut: Julie Courraud, Madeleine Ernst
- Steno Diabetes Center: Cristina Legido Quigley
- NNF Center for Protein Research: Karolina Sulek
